

Minnesota FAASTeam presents:

Takeoff Accident - A Personal Account

Woody Minar and Jeff Moryn were involved in a takeoff accident in August which totaled the airplane; they walked away. Woody will relive their experience as to the events leading up to the accident, what may have caused it, the aircraft retrieval, and the aftermath with the FAA and NTSB. He will share their thoughts on what was going through their minds during the takeoff and, in hindsight, what they could have done differently to prevent it. As a CFI, Woody will also reflect on his training modus operandi and what instructors can add to their training syllabus. In the eyes of the FAA, what ramifications are there to the pilot in command? Enter the new FAA philosophy.

Directions: This seminar will be located in the Modern Avionics Hanger located behind shop. If flying in, ramp is full and you need to park across the taxiway in the grass please notify Flying Cloud Ground Control of your intentions.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
