

Scared of Spins?

Join Peter as he takes on his spin training endorsement, an FAA requirement for every CFI-in-training. Follow along with a quick spin briefing and then be in the plane for all of the dizzying fun with cockpit video of his flight. We'll break spins down in a way that's practical and easy to understand so you can be smarter about positive aircraft control and stall/spin prevention and recovery. Don't miss it!

Directions: This seminar will be located in the Modern Avionics Hangar located behind shop. If flying in, ramp is full and you need to park across the taxiway in the grass please notify Flying Cloud Ground Control of your intentions. You may want to consider bringing a chair in case there are none available when you arrive.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
