

Mountain Flying - TWO HOUR Seminar

Details on decision making for flying in mountain terrain considering the following: Weather, winds, mountain passes' both high and low, turbulence, density altitude, aircraft capability, survival gear, and emergency consideration.

Video and slides included on all aspects of flying in different geographical areas including Alaska, West Coast, New England, and Rocky Mountain areas.

Directions: This seminar will be located in the Modern Avionics Hangar located behind shop. If flying in, ramp is full and you need to park across the taxiway in the grass please notify Flying Cloud Ground Control of your intentions. You may want to consider bringing a chair in case there are none available when you arrive.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice.
