

# The Engine Failure Emergency - A Survival Guide

DPE, Master CFI, FAASafetyTeam Lead Rep, and CFI of the Year Woody Minar will present an interesting analysis he's done of the causal factors for an engine failure of nearly a thousand accidents over a ten year period, how to prevent one from happening, and what to do if you experience one. Nearly half the engine failures can be prevented while still on the ground. Find out how to prevent one before taking off as well as during flight.

**Directions:** This seminar will be located in the Modern Avionics Hanger located behind shop. If flying in, ramp is full and you need to park across the taxiway in the grass please notify Flying Cloud Ground Control of your intentions. You may want to consider bringing a chair in case there are none available when you arrive.

## A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
