

Flight Testing the Cirrus Airframe Parachute System and Cirrus Vision Jet

Gary will talk with us about the research and development behind the Cirrus Airframe Parachute System, and also update us on the Cirrus Vision Jet. And, Gary often has some fun "show and tells", so join us to see what's new at Cirrus!

Directions: This seminar will be located in the Modern Avionics Hanger located behind the shop. If flying in and the ramp is full, you will need to park across the taxiway in the grass. Please notify Flying Cloud Ground Control of your intentions.

You may want to consider bringing a chair in case there are none available when you arrive.

We hold our seminars in pretty much any weather. For questions about possible cancellation for inclement weather, please call Laura at number below.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
