

## Snowflakes on Approach Plates and Ice Crystals on Runways

Bill will discuss changes to runway braking action and runway condition codes along with talking about that little snowflake on instrument approach charts and what it means to IFR pilots during the cold months.

**Directions:** This seminar will be located in the Modern Avionics Hanger located behind shop. If flying in and the ramp is full, you will need to park across the taxiway in the grass.

Please notify Flying Cloud Ground Control of your intentions. You may want to consider bringing a chair in case there are none available when you arrive.

We hold our seminars in pretty much any weather. For questions about possible cancellation for inclement weather, please call Laura at number below.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
