

MN FAASTeam presents:

Drone Flying for Hobbyists

Kevin Morris, the FAA's "Drone Guy", will be presenting the latest information on how Congress and the FAA are managing recreational drone flyers. Whether you fly a quadcopter or an RC airplane, this is a seminar you won't want to miss. He will cover airspace restrictions, new rules, and discuss the test that all recreational flyers will soon need to pass. Kevin is the former FAASafety Program Manager for Minnesota and now work at FAA Headquarters where he writes policy and guidance for drone flying and is also the host of the FAA's series of webinars on UAS operations.

Directions: This seminar will be located in the Modern Avionics Hanger located behind shop. If flying in and the ramp is full, and you need to park across the taxiway in the grass please notify Flying Cloud Ground Control of your intentions. You may want to consider bringing a chair in case there are none available when you arrive. We hold our seminars in pretty much any weather. For questions about possible cancellation for inclement weather, please call Laura at number below.
