

MN FAASTeam presents:

Float Plane Ground School

This seminar will be ground training for pilots who wish to transition to flying floats. Topics covered will include types and parts of floats, taxi procedures, amphibious operations, float plane safety, taxi procedures, docking and beaching, float plane performance, seaplane and maritime rules, takeoff and landing techniques, loading, and flight planning for float flying. This seminar will be a great start for any pilot who wishes to obtain a sea plane rating.

We will have individuals available to help pilots register with www.FAASafety.gov, so you may participate in the WINGS program. Come see how participating in the WINGS program can make it easier for you to remain flight current.

Directions: Seminar will be conducted in the North Point Aviation meeting room in the general aviation terminal.
