

Crack Open the 6 Pack!

Come join us for this unique hands-on seminar on the theory and operation of traditional pitot-static and gyroscopic flight instruments (6 pack) with actual flight instruments that have their covers opened.

This seminar is great for student pilots working on their private, and licensed private and commercial pilots including CFI's flying single or multi-engine airplanes (self owned or rented).

Off of 212 turn south on to County Highway 1 / Dairy Ave.

Airport entrance is on left side.

A message from the National FAASTeam Manager
