

What is Behind the Glass

Join us for a free presentation on the construction and theory of how electronic flight displays work. Each of the primary flight instruments will be reviewed and how they differ from traditional flight instruments. In addition key operational risks and special considerations unique to electronic flight instruments will be presented. There will be time for individual questions and answers.

This seminar is for students pilots working on their private, licensed private and commercial pilots including CFI's flying single or multi-engine airplanes (self owned or rented).

Off of 212 turn south on to County Highway 1 / Dairy Ave.

Airport entrance is on left side.

A message from the National FAASTeam Manager
