

Which Medical Best Fits Your Mission?

We are very lucky to have more than one option available to us for medically certify to fly in the United States. The traditional FAA medical certification remains an option, but BasicMed became a viable option for many pilots several years ago. When MOSAIC went into effect in October of 2025, we now find another option available to us as pilots. We will explore how to best determine your mission and provide perspectives of the various medical options and which ones will let safely operate as a pilot in the national airspace system.

Seminar in Hangar A

Airport is located southeast of the City of Buffalo off of Highway 55. Turn north on County Road 134 (at the Kwik Trip) and the airport will be on your right just past Menards. It is easy to find using GPS/map apps.

Signs will be provided to guide you to parking.

Self serve fuel available with credit card.
