

## EAA Chapter 129 IMC Club

You're flying IFR when you hear and feel a sudden "thump." Probably nothing, but what might or should we be thinking about? We will analyze a very real-world scenario from the cockpit and, as a group, share our immediate plan of action. Learn from other pilots' experiences and walk away with confidence-boosting tools for your next emergency. This is hands-on scenario-based training at its best!

Whether driving or flying, park at Synergy Flight Center (FBO) and proceed to Hangar F15 which is located at the north end of the parking lot. It is the last hangar on the first row of T-hangars.
