

EAA Chapter 563 VMC Club

This Sunday the 26th at 6:30, join us in the EAA 563 hangar for our VMC Club's monthly scenario review. We will review a proposed flight in which a pilot encounters unforecasted headwinds along his route to Jackson Hole Airport. Critical elements of discussion include diversion options, fuel tank selector management, and weight and balance. Additionally, our EAA Question of the Month covers visual traffic scanning techniques in modern avionics environments. Attendees are eligible for WINGS credit for Knowledge Topic 2.

The meeting will be held in the EAA chapter hangar #57 on the south side of the field. Attendees who are not chapter members should contact the event coordinator for gate access and directions from the FBO. Fly-in traffic can park on the tees next to the FBO and contact the coordinator for an escort down to the hangar.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
