

EAA Chapter 129 VMC Club Meeting

A clear sky at departure may hide changing conditions along your route. Join EAA Chapter 129 VMC Club on October 10 to explore what makes a thorough, useful VFR preflight weather briefing.

We'll review FAA preflight responsibilities under 14 CFR 91.103 and compare online briefings from ForeFlight and Leidos Flight Service using the same sample flight. Topics include weather hazards and trends, forecasts, winds, PIREPs, NOTAMs, TFRs, personal minimums, and briefing updates.

Bring your questions and share your experience as we turn weather information into practical go/no-go decisions.
