FAASTeam presents:

EAA Chapter 563 IMC Club

This Sunday, November 8th at 6 p.m. local, please join us in the EAA 563 hangar for our monthly IMC club meeting and scenario review! We will discuss a proposed flight in which a pilot contends with low ceilings, unfriendly geography, and slipping daylight. Would you cut across Lake Michigan if it meant better en route weather and a shorter flight time? Key elements of the discussion will include overwater operations, IFR communications, and weather risk mitigation. We will also review our EAA Question of the Month.

The meeting will be held in EAA Chapter Hangar #57 on the south side of the field. Non-member attendees should contact the event coordinator for gate access and directions from the FBO. Fly-in traffic can park on the tees next to the FBO and contact the coordinator for an escort down to the hangar.

A message from the National FAASTeam Manager
