FAASTeam presents:

EAA Chapter 563 VMC Club

This Sunday, November 22nd at 6:30 PM, please join us in the EAA 563 hangar for our monthly VMC club meeting and scenario review! We will discuss a proposed flight in which a pilot impacts a deer after a late go-around and is left unsure of the damage to the aircraft structure, including its retractable gear system. With the sun sinking lower on the horizon, would you elect to try landing again on the same runway or head elsewhere to a field with potentially bigger runways and more services? Key discussion points include go-around technique, crew resource management, and in-flight aircraft damage assessments. We will also review our EAA Question of the Month.

The meeting will be held in EAA Chapter Hangar #57 on the south side of the field. Non-member attendees should contact the event coordinator for gate access and directions from the FBO. Fly-in traffic can park on the tees next to the FBO and contact the coordinator for an escort down to the hangar.
