

All the Stuff You Forgot, but Wanted to Remember: From Ramp Safety to Special Use Airspace

We will be discussing basic piloting essentials that have recently led to high profile aviation accidents and incidents. With today's TAA and complicated airspace, it seems that basic piloting skills are being neglected. This seminar will focus on some of these areas, such as: slow flight, landing, airspace, ramp safety and automation.

Directions: Enter Clifford hall and proceed up the main stairs. Take a left and room 210 will be directly at the end of the hall before the skywalk. For anyone without a UND parking pass, please see Leslie Martin at the doors of Room 210 for a temporary parking pass so your vehicle will not be ticketed.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
