## Air Safety Institute – Pilot Safety Seminar, Fall 2015

### “Cross Country Challenge”

When we talk about safety, we normally tackle one issue at a time—thunderstorms one day, taxi clearances the next. But out in the real world, any given flight can bring together a whole range of interconnected safety issues:

- Fly through that precipitation...or deviate and cut into my fuel reserve?
- Climb above that scattered layer...or risk airsick passengers?
- Fly with an underinflated nose strut...or delay and fly in worse wx?

Our new seminar reflects that reality. You'll follow along as we “fly” two fictional trips, answering questions (and debating answers) along the way. From preflight planning to tie-down technique, if it's related to the flight, it's fair game!
