

It's all good, the benefits of flying into a Tower Controlled Airport.

To a pilot that stays local most of the time, a trip to an airport that has a control tower can be a scary adventure. No worries! This event will discuss the airspace, operations in the air and on the surface at small and larger tower controlled airports, communications, and operations at night.

Tim Johnson, Fargo Airport, Control Tower Manager, will join this event in talking about the Fargo ATCT, the airspace around the Fargo area, and operations in the Class D controlled airspace.

Directions: From Main Ave. in Valley City, go to 12th Ave. NE and head towards the rail bridge (North). The Country Club is on the end of the street just before it turns back West.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
