

Hold my coffee and watch this! Stabilizing the approach and knowing when to go around

This event will include honoring Robert Hanson as a Master Pilot. Come join us this meeting as we honor Robert.

We will discuss the factors affecting a non stabilized approach and how to correct that in your training.

When is the last time you had to go-around? Fact is, no airman truly expects to have to go-around and when the time comes training is the only tool we have that can prepare us such an event.

Directions: From Main Ave. in Valley City, go to 12th Ave. NE and head towards the rail bridge (North). The Country Club is on the end of the street just before it turns back West.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
