

EMI Monthly Safety Meeting April 2024

Emphasizing the best practices associated with managing aircraft energy in flight.

Teaching Points:

- General aviation accidents have resulted from loss of control while maneuvering and during emergency descents, approaches, and landings.
- The likelihood of maintaining positive control and executing successful forced landings can be improved through awareness of and successful managing of aircraft energy state throughout all flight phases.

Other topic(s) to be presented.

Via personal vehicle - ample parking in terminal parking lot.

Fly-in: park on ramp as directed by ATC.
