

DATE April 1

Summary:

The EAA IMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario titled "Surprises at Night" describes an actual flight as follows:

During a night IFR flight in actual IMC in the Midwest, our pilot encounters what appears to be unexpected turbulence, and also notices some odd behavior by the autopilot. If you were in this situation, what precautions could you take, and what would you do if things got worse?

Join in the discussion. Give us your opinion. You may be surprised at how many ideas the group will have and have some fun, learning at the same time! Please join us and tell us **“What would you do?”**.

Bring your EFB, your experience, and your questions, and be ready to participate.

All are welcome. You do not need to be an EAA member to attend.
