

DATE April 1

Summary:

The EAA VMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario titled "Bumpy Final" describes an actual flight as follows:

Our pilot is flying a Piper PA-28 Dakota on a 100-mile flight with a friend. While conditions are VFR, there are some low clouds and showers along the route causing some deviations, and the winds at the destination are unpredictable. If this were you, what should you be prepared for? What precautions can you take to ensure a safe flight?

Join in the discussion. Give us your opinion. You may be surprised at how many ideas the group will have and have some fun, learning at the same time! Please join us and tell us **“What would you do?”**.

Bring your EFB, your experience, and your questions, and be ready to participate.

All are welcome. You do not need to be an EAA member to attend.
