

DATE June 1st

## Summary:

The EAA VMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario titled "Unfamiliar Airplane" describes an actual flight as follows:

Our pilot is making an afternoon flight in a Cessna 182 Skylane. The pilot is competent and current, but has fewer than ten hours in the type. While this is a straightforward VFR flight that is expected to take slightly less than three hours, what precautions can be taken to mitigate the lack of experience in this specific type? How can you prepare for a potential emergency in an unfamiliar airplane?

Join in the discussion. Give us your opinion. You may be surprised at how many ideas the group will have and have some fun, learning at the same time! Please join us and tell us "What would you do?"

Bring your EFB, your experience, and your questions, and be ready to participate.
