

DATE September 2026

Summary:

The EAA VMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario titled "Fun with Flaps" is based on an actual flight as follows:

After practicing a number of commercial maneuvers to prepare for a checkride, you as our Cessna 172 pilot encounter an unusual mechanical issue while returning to the airport. How can you prepare for keeping the airplane under control in nonstandard configurations?

Join in the discussion. Give us your opinion. You may be surprised at how many ideas the group will have and have some fun, learning at the same time! Please join us and tell us "What would you do?".

Bring your EFB, your experience, and your questions, and be ready to participate.

All are welcome. You do not need to be an EAA member to attend.
