

DATE October 2026

Summary:

The EAA VMC Club provides a "hangar flying" experience organized around visual flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario titled "Final Conflict" was inspired by an actual flight as follows:

You as our pilot are preparing to do some takeoffs and landings in a Piper Dakota to maintain currency. It's a nice day, so you'd expect the pattern at the uncontrolled airport to be pretty busy. What precautions can you take to minimize risks and ensure safe operations when you're not the only one in the pattern?

Join in the discussion. Give us your opinion. You may be surprised at how many ideas the group will have and have some fun, learning at the same time! Please join us and tell us "What would you do?".

Bring your EFB, your experience, and your questions, and be ready to participate.

All are welcome. You do not need to be an EAA member to attend.
