

Avoiding Runway Incursions and Pilot Deviations

Why, with all the amazing technology available, do we still have runway incursions and pilot deviations? Come, give your input and discussion points about this timely subject. This seminar was first presented as a CFI seminar, but the material is too good to leave on the shelf. Thought provoking and very timely subject.

Directions: Join the Galion Pilot's Association for their monthly meeting and a presentation on Runway Safety and avoiding pilot deviations. Rumor has it Doc will have his hotdogs available afterwards, with popcorn making the terminal building smell good. Join with others anticipating the break out of Spring weather and the unofficial "Flying season." Up the stairs to the meeting room, but chances are the pilots are hanging around near the popcorn machine on the first floor. Bring your flight instructor or student along for some good discussion.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants.
