

GAJSC-Topic of the Month - 'Aircraft Performance and Single Pilot CRM'

Investigations of General Aviation Loss of Control Accidents often cite inadequacies in Aeronautical Decision Making and – a subset of ADM – Single-pilot Cockpit Resource Management skills. Occasionally investigations have discovered causal factors resulting from unreasonable expectations of aircraft performance. This outreach effort deals with the importance of realistic performance expectations based on sound aircraft and pilot performance assessments and calculations.

Directions: For turn-by-turn directions, please use internet software such as GoogleMaps, MapQuest, Rand McNally, etc. When you enter the airport, Discover Aviation Center is at the far West row of hangars in the Northeast corner of the airport. Please follow the posted signs.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
