

Spatial Disorientation

This outreach will consist of 2 videos produced by the Civil Aeromedical Institute (CAMI). The first video deals with human physiology & spatial orientation. The second addresses common visual illusions.

We will discuss the physiology and limitations of human sight and balance mechanisms.

There will be a "Barany" chair available for a 'hands on' demonstration. Will you take a spin?

We will also have question and answer session to discuss and offer responses to typical disorientation and illusion events followed by a discussion detailing best practices for preventing Spatial Disorientation.

Directions: Burke Lakefront Airport is located in downtown Cleveland on the shore of Lake Erie. The event will be in the main terminal building at the west concourse conference room. Parking is free along the front of the terminal building on a first come first served basis.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
