

# 'Double Feature' Loss of Control Presentation - 'Automated Systems' and 'CFI Education Series'

Many loss of control accidents have occurred where airmen were unfamiliar with the automated systems in his or her aircraft. The first part of the event will discuss those factors of automated systems that can lead to a loss of control. The second part of the double feature will include a CFI Education Series as a discussion for CFI's to examine the responsibility to students, setting higher standards, promoting a culture of safety and personal standards and self improvement as emulated in the aviation community.

**Directions:** This event will be held in the main terminal building. For detailed driving directions, please use internet software such as GoogleMaps, MapQuest, Rand McNally or similar.

## A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
