

## Detailed Pre-Flight After Maintenance

A significant number of general aviation fatalities could be avoided if pilots were to conduct more thorough preflight inspections on aircraft that have just been returned to service. We will discuss the elements of conducting an advanced preflight before your first flight out of maintenance. Additionally we will conduct a hands on preflight of an aircraft in the hangar as well as learn about the elements of a standard FAA Ramp Check.

Event taking place in Ballou Skies Aviation Hangar.
