

Soar Into Aviation Education - Kent State University

This three-day workshop is free and open to all high school educators and or administrators with an emphasis on communities in need of renewed economic viability and assistance with workforce development. It is designed for those who want to educate future manned aircraft pilots and UAS operators.

Topics covered include drone flight techniques, Part 107 certification guidance, drone registration procedures, and operating within a crewed environment. This workshop includes training sessions to use Kent State's established curriculum and tools to discuss with students the educational and career pathways, and training in virtual reality (VR) curriculum in aircraft pilot and UAS operations.
