

EAA Chapter 846 VMC Club

Our program will be a discussion about Howgozit and Howzitlook. We will talk about various techniques we can use to check the safe progress of our flight, from preflighting to the tiedown. Do you compare your actual fuel burn to the flight-planned fuel burn while enroute on a cross-country? Do you make a note of the estimated flight time during the preflight and then compare it throughout the flight? Should you be concerned with any of these during a local flight? Various aspects of ForeFlight will be covered, as well as the FAA General Aviation Joint Safety Committee topic of the month.

We will meet in the classroom in the terminal building at Skypark Airport.

A message from the National FAASTeam Manager
