

FAASTeam Safety Seminar

There is plenty of data available on aircraft accidents, and many of them preventable. Colder weather increases accidents and incidents involved in ice. Being prepared and having proper planning is essential for making a safe flight. This safety seminar will look at Tailplane icing and it's effects on performance. If you're thinking accidents are something that will happen to someone else and not yourself, you best attend this seminar. Come join us as we look at the human errors which continue to cause many accidents.

Directions: Pierre Regional Airport at Mustang Aviation

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
