

Safety Seminar

What is NextGen...., and how will this new technology impact general aviation? Come join us as we take a look at the benefits of the Automatic Dependent Surveillance-Broadcast (ADS-B), EnRoute Automation Modernization (ERAM), System Wide Information Management (SWIM), and National Voice System (NVS). In addition, what really causes aircraft accidents and how can they be avoided? Do miss out on sharing information between pilots. See you there !

Directions: This Saturday Morning Safety Seminar will be conducted at the Main Office Building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
