

FAASTeam Safety Seminar / RSAT

Understanding Aircraft Performance & Limitations are crucial elements to flying safely.

Understanding your own personal performance & limitations are just as important as understanding your aircraft performance & limitations. So many pilots don't associate their personal proficiency with the understanding of aircraft performance & limitations. This safety seminar will explore the human element as it relates to the practical application of decision making. This event also includes information and feedback from the Runway Safety Action Team (RSAT). See attachment for RSAT Checklist.

Directions: This Safety Seminar will be conducted at the Sioux Falls Regional Airport in the Main Terminal Main Floor Conference Room across from the Terminal Restaurant.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
