

South Dakota FAASTeam presents:

FAASteam Safety Seminar / RSAT

Operations at towered controlled airports requires effective communications. Because air traffic control (ATC) coordinates traffic at towered airports, pilots follow different procedures than at non-towered airports. This safety seminar will be your opportunity to discuss current issues and concerns at the Sioux Falls Regional Airport. This event will include information and feedback from the Runway Safety Action Team (RSAT). Air traffic controllers are there to provide a safe operating environment for airport/airspace users and now is your time to ask questions from the Sioux Falls ATC. Speakers will be from the Sioux Falls Air Traffic Control Tower. Ramp communications between vehicles and ATC is critical for those maintenance technicians also, especially when conducting aircraft engine testing associated with certification and inspection work. Mr. Jeff Boe, FAAS Team Program Manager will be conducting a presentation regarding effective ground communications.

Understanding Aircraft Performance & Limitations are crucial elements to flying safely, especially at higher elevation airports. Understanding your own personal performance & limitations are just as important as understanding your aircraft performance & limitations. So many pilots don't

Event Details

Wed, Apr 12, 2017 - 19:00 CDT

Sioux Falls Regional Airport

Terminal Conference Room

2801 North Jaycee Lane

Sioux Falls, SD 57104

associate their personal proficiency with the understanding of aircraft performance & limitations. This safety seminar will explore the human element as it relates to the practical application of decision making. Mr. Steve Hoogerhyde, FAASafety Team Program Manager will be conducting a presentation on mountain flying and the dangers associated with not planning effectively for higher elevation performance.

Directions: This Safety Seminar will be conducted at the Sioux Falls Regional Airport in the Main Terminal Main Floor Conference Room across from the Terminal Restaurant.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
