Select #: GL2785091

FPM Steven R. Hoogerhyde

This all-day seminar & training course will provide the instrument rated pilot with a refresher of flying under instrument flight rules (IFR). How long has it been since you reviewed the minimum requirements for alternate airports, or even re-evaluated your own personal limitations? Flying Garmin (G-1000) equipped aircraft along with other information will be discussed in real-world scenarios providing you an excellent overview of the basics for IFR pilots.

Whether you're training to become an instrument rated pilot, or wishing to gain some valuable insight, this special event will combine a variety of topics into a good overview of the basics for IFR pilots.

Come join us as we review a wide variety of topics, discuss risk assessment, and flying IFR safety within our nation airspace system (NAS).

**Directions:** This all-day seminar & training course will take place at Signature Aviation at the Sioux Falls Airport.

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
