

ADM and the Experimental Aircraft

You have worked for two years, or more, on your new amateur-built aircraft. The first test flight looms near. What have you forgotten? The weather is forecast to get worse next week. You feel compelled to get the airplane in the air. What could happen? Let's discuss "pressure points" that have happened to others, which led to less than desirable outcomes.

Directions: From Hwy 9 take Marsh Road East to Airport Way and turn left into Harvey Field at 9900 Airport Way. Presentation will be held in the EAA Hangar.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
