

Will Your Traffic Pattern Turns Put You in Jeopardy?

Towered or non-towered airports, your turns will decide your fate. Do you think about turns before you make them? Are your turns coordinated and did you look before you turned? Are you listening on the proper frequency? Are you on the proper side of the airport for the runway and noise abatement? Where's the other guy? Did he say eh? How are your stick and rudder skills? When was the last time you shot a landing in winds like these? With the rising costs of aviation, every minute that you fly you need to be honing your skill sets. Do you? We have asked enough questions, your turn to ask at the FAASTeam seminars.

Directions: FAASTeam Safety Seminars are held in the FAA Forum Tent "D". If flying into AWO, please check NOTAMS and see the Arlington Fly-In "FLYING IN" web page link in "Additional Event Information".

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
