

Stall/Spin Awareness

We all practice and perform stalls during training and for flight reviews. But stall/spin accidents annually account for 10 percent of GA accidents, and about one-third of those accidents result in fatalities. This presentation discusses the aerodynamics of stalls and spins and uses in-cockpit video to demonstrate stall/spin scenarios and avoidance/recovery techniques

Directions: Presentation will be in the classroom downstairs. Light refreshments will be served.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
