

## Weather Workshop II

Aviation Weather Center (AWC) forecasts, like the AIRMETs, SIGMETs, and Area Forecast, are critical weather products used by pilots in virtually every aviation weather briefing. Here is a chance for you to learn how icing, turbulence, and IFR conditions are forecast in these products from an actual NWS Aviation Weather Center meteorologist. Also in this presentation is a “heads up” on what changes in the Area Forecast format will be forth-coming in 2015

**Directions:** Western Washington Fairgrounds are located in Puyallup, just off Hwy 512 at the corner of S. Meridian and 9th Avenue SW. Enter fairgrounds through the Blue Gate. This seminar will be held in Room E, North Foyer.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
