

Assimilating Aviation Weather Data

This seminar is intended to provide further information and techniques for pilots who use the Internet to help in briefing for a flight. It reviews the basic Aviation Weather observation and forecast products and takes a closer look at the synopsis, which should tie a weather briefing together. The last part is a short real time demonstration of assimilating and interpreting current weather data via the Internet.

Directions: The restaurant is located in the Benson Center near SE 240th St. and 104th Ave. SE on Kent East Hill.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
