

Flying at night - don't get caught in the dark!

The old saw may be true, “flying at night is no different than flying in the day,” except you can't see anything! From illusions that lead to controlled flight into terrain (CFIT), to spatial disorientation resulting in loss of control (LOC), the risks go up when the sun goes down. Join Professor Dale Wilson as he illuminates the threats that lurk in the dark and outlines strategies that you can use to avoid or mitigate them.

Directions: FAA Forum Tent D

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
