

## Flying the Cascades in the summer.

Allen Kam, from the National Weather Service in Seattle, is a pilot and he loves to share his weather related information with fellow pilots. This seminar covers the various observational and forecast data available to a pilot planning a flight across the Cascades. Time permitting Allen will cover the four primary warm season weather problems and their associated hazardous conditions that a pilot may encounter over the Cascades. Note: this seminar does not cover tactical planning decisions in flying the Cascades.

**Directions:** FAA Forum Tent D

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
