

Crew Resource Management (CRM) and General Aviation Safety.

For years, airlines have used CRM (crew resource management) training to significantly improve safety. Join us to learn how you can use SRM (single pilot resource management) to improve the safety of your flying. Specifically, we will discuss Situational Awareness, Task Management, Automation Management, Risk Management, ADM and CFIT. Through applying a systematic approach to the way you think and act you can prevent becoming another NTSB statistic.

Directions: From Hwy 9, the Snohomish-Woodinville Hwy, go east on Airport Road and arrive at Snohomish Flying Services on the left. Meeting will be in the hangar # 15 on the main ramp.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
