

## Flying RNAV (GPS) Instrument Procedures.

Mr. Bruce Williams ([www.BruceAir.com](http://www.BruceAir.com)) is an instrument flight instructor who specializes in advanced avionics and the use of simulation to compliment flight training.

Learn about important techniques that will help you fly RNAV (GPS) instrument procedures, including departures, arrivals, and approaches. Although the presentation uses Garmin GNS and GTN avionics for demonstration purposes, these techniques apply regardless of which avionics you use. And they'll help you avoid common pilot errors and frustrations when setting up and flying instrument procedures with popular IFR-approved GPS system.

**Directions:** The Presentation will take place in the conference room at the basement of Modern Pilot. Access to the basement is on the left hand side of the building.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
