

FAASTeam presents:

## All about TAFs

The first part is the nuts and bolts of a TAF, what they are and how they fit in the spectrum of aviation weather forecasts, what information is covered in a TAF and the format. The second part is an overview of how a TAF forecast is made and what data is used in their composition. Included are on or two short exercises where we try composing a TAF based on sample data.

**Directions:** Located at the Renton Municipal Airport. This seminar will be held in the Rainier Flight Service classroom.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
