

Hypoxia Simulator (PROTE) Portable Reduced Oxygen Training Enclosure Presented by CAMI

The PROTE is a traveling altitude "chamber" which is capable of producing hypoxic environments at ground level by altering the fraction of ambient oxygen. This avoids some of the risks associated with pressurized altitude chamber training.

Directions: This event will take place at the Class room and Hangar of Rainier Flight Service.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
