

Mountain Flying Seminar At The Arlington Fly-In

With spring coming to the great Pacific Northwest, weather will begin to improve, mountain airports will start to thaw, and we'll be looking to get out of the house and start our 2018 flying adventures! Mountain flying provides for breath-taking scenery, unique fly-in destinations, and opportunities for pilots to hone their navigation & planning skills. In this 1-hour seminar, we will look at preflight preparation for mountain flying, mountain meteorology, evaluate route planning and aircraft performance, and discuss options for handling "off-airport" landings in mountainous terrain along with mountain survival tips. This free seminar is open to all those interested in flying in and around mountainous terrain.

Directions: FAA Forum Tent TBD

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
